STEEL

PANEL OPTION

The PBR metal panel (R panel) is commonly used for a wide variety of architectural, agricultural, commercial and industrial applications.

STOCK COLORS

RAPID Steel Buildings are available in a wide selection of colors. Please refer to the quoting software for the full range of options.

[**CLICK HERE FOR A QUOTE**](#)

RAPID Steel Buildings come with a complete set of engineered erection drawings for easy assembly. Each building is designed and engineered for the specific snow and wind loads in your area.

THE POWER OF POWERHOUSE

Powerhouse Building Products is a Canadian owned company providing steel buildings and building components. Whether you're choosing to build new, renovating or repairing your current building, we can help.

Powerhouse can also provide installation services for all of our products lines.

RAPID STEEL

COST EFFECTIVE

One of the most compelling advantages of RAPID Steel Buildings is their cost-effectiveness. RAPID Steel cold formed building sections are manufactured using a highly efficient roll-forming process, which minimizes material wastage and labor costs.

RAPID Steel Buildings are the best most economical choice for buildings with added options, such as mezzanine floors, eaves, overhangs, and lean-tos. Such options can be quickly and easily priced, engineered, and supplied. Options can be more difficult with structural steel and Post Frame.

FLEXIBLE DESIGN

RAPID Steel Buildings are inherently lighter than their red iron steel counterparts. This characteristic not only simplifies transportation and on-site handling but also reduces foundation requirements.

With less weight bearing down on the foundation, construction costs are further minimized, making RAPID Steel Buildings an attractive option for projects where foundation constraints are a concern. RAPID Steel buildings typically have 20-25% less concrete than a structural steel building.

SPEED OF ASSEMBLY

Time is of the essence in construction projects, and RAPID Steel Buildings excel in this aspect. The lightweight nature of RAPID Steel buildings components, coupled with their precise manufacturing tolerances, facilitates RAPID on-site assembly.

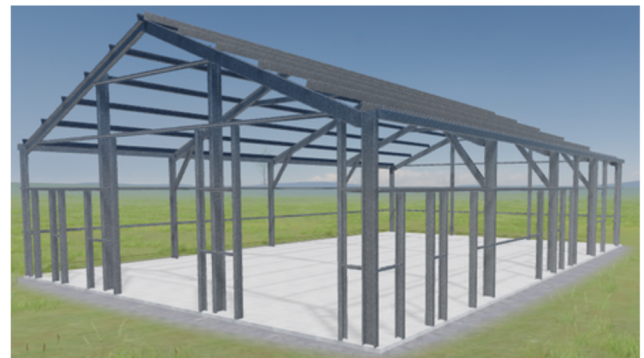

SPEED OF DELIVERY

From ordering to delivery, your RAPID Steel Building will be on-site in just 3-4 weeks.

NOW THAT'S RAPID!

RAPID Steel Buildings are easily designed using online modeling software
